

City of Springdale Nuisance Animal Control Policy

The nuisance animal control program is administered out of the Health Department on behalf of the City of Springdale. Residents encountering nuisance animal issues will be directed to an animal control business and/or the City will have several "Have a Heart" type animal traps that can be loaned to a resident if they want to trap the animal on their own. These traps will be loaned out after the resident has read and signed "The City of Springdale Health Department "Have A Heart" Animal Trap Release and Waiver of Liability Form" and have read 1501:31-15-03 Nuisance Wild Animal Regulations. Residents borrowing traps must abide by the guidelines and rules set forth in the information provided to them. Residents that capture an animal on their own property may release the animal on their own property. If a resident traps any one of the following 6 animals: raccoon, skunk, opossum, beaver, coyote or fox and they want it removed from their property, they will have to call an animal control company to assist them with the animal removal.

Sick or injured wild, stray or feral animals will be picked up and removed by SPCA of Cincinnati by calling 513-541-6100 to request SPCA assistance.
