

Prevent Mosquito-Borne Diseases

Do you have standing water in your yard?

Empty standing water containers/areas or come to the **Springdale Health Department to pick up a Mosquito Dunk**

Mosquito Dunks release larvicide into the water. Once the larvicide is released, larvae consume the product and are killed.

Mosquito Dunks may be used in:

- Bird baths
- Flower pots
- Rain barrels and gutters
- Tires
- Water gardens
- Tree holes
